Drivers for change

How companies have already adjusted

- Online Meetings & chat ✓
- E-singing ✓
- Remote work ✓

Pain

- **Problem with scattered documents** now even bigger due to e-signing: email inboxes or signing tools archives -> lost documents => lack of SPEED & AGILITY needed to react to these challenges and opportunities.
- **Email communication for sharing:** company boards and management teams share a lot of material with emails
- **Document management with traditional file systems does not work:** need to be cloud, need metadata based, need proper access management, need AI-powered OCR
- **Making 3rd party audits online:** how to manage sharing right documents for auditor, tax official, Due diligence situation
- **Meetings in TEAMS, OK!** Are your meeting documents organized, discussed, reviewed, signed and archived efficiently online as well?

BEST VALUE FOR SMBs

The market has been missing an attractively priced, self-service solution targeted for organizations with less than 1000 people

ContractZen gives the best value compared to any other solution for the target segments

Unique all-in-one SaaS-solution

ContractZen offers a unique set of tools for governance: metadata-driven contract management, board portal (meeting management), built-in data rooms (VDR), company register and e-signatures.

Instantly ready-to-use fully scalable solution

Microsoft Azure based ContractZen needs no installations, costly consulting or technical implementation projects.

Ease of use

Unlike most governance solutions on the market, you can try, buy and deploy ContractZen's easy-to-use solution on your own. The great user experience guarantees that people will actually use it.

Disruptively low pricing

Despite being technologically a state-of-the-art solution, ContractZen is priced disruptively low. Therefore it fits all kinds of organizations in all industries around the world.
